(Received December 26 1993)

Key words: superconductivity, odd frequency gap, composite operator.

PACS Nos. 74.20-z;74.65+n

In the recent paper [1] an erroneous statement that the composite order parameter for odd-frequency pairing was originally proposed by Berezinskii [2] was made.

Since the recent revival of the interest in odd-frequency pairing [3], the composite order parameter has been proposed in Abrahams et.al. [4], V. Emery and S. Kivelson [5] and in Coleman et.al. [6].
